Introduction

With the idea of "LIVING TOGETHER", Kyocera Document Solutions promotes the reduction of environmental impact on all aspects of our corporate activities in accordance with the "Kyocera Document Solutions Environmental Safety Policy" that embodies the "Kyocera Environmental Charter". In December 2003, we established "Standards on the Management of Certain Chemical Substances" and have managed Substances Included in Products through our supply chain.

Thank you very much for your cooperation in complying with "Standards on the Management of Certain Chemical Substances".

In the interest of more reliable and efficient compliance with "Standards on the Management of Certain Chemical Substances", we have recently re-examined them, introducing the chemical investigation using the chemSHERPA information transfer scheme.

We appreciate your continued cooperation and further understanding of our efforts and perspectives towards environment conservation.

Kyocera Environmental Charter (an abstract)

[Environmental Management Policies]

1. Compliance with internal environmental standards, of which, global environmental protection is made the number one priority
2. More efficient utilization of resources and energy, development of processing technologies
3. Development of earth-friendly products of two types: Environmental Improvement Products that will make a positive contribution to the improvement of the global environment; and Environmentally Gentle Products that will achieve a far lower burden on the global environment
4. Cooperation with government environmental policies, and participation in or support of social contribution activities

[Environment Management Objectives]

1. In order to minimize the destruction of the natural environment and any harmful effects on the ecosystem, Kyocera will establish and comply with internal standards that are equal to or more stringent than the standards specified in applicable international agreements, the legal/governmental regulations of relevant countries and the regulations of regions where the Company's facilities are located.
2. At all levels, Kyocera will study and evaluate scientifically the effects of its business activities on the environment, and take the necessary protective measures.
3. Kyocera will develop processing technologies and production facilities with maximum resource and energy efficiency in all manufacturing processes. At the same time, the Company will aim to reduce raw material utilization in all processes.
4. Kyocera will promote in-house energy conservation activities, such as more efficient use of electricity and fossil fuels, the introduction of high efficiency equipment, and the reutilization of thermal energy.
5. Kyocera intends to purchase recyclable materials that contribute to resource conservation. At the same time, the Company will maximize resource utilization by establishing recycling systems for waste-water and waste materials. The Company will take aggressive steps to recycle, decontaminate and reduce the volume of all of its industrial waste.
6. Kyocera will research and develop "Environmental Improvement Products" that make a positive contribution to the improvement of the global environment.
7. Kyocera will research and develop "Environmentally Gentle Products" that are gentle to Planet Earth and place a lighter burden on the environment at every stage of production, sales, distribution, consumption and disposal.
8. Kyocera will promote the "greening" (forestation) of its facilities in an organized effort to create lush and inviting grounds.

Chapter 1. Policy on management of Substances Included in Products

1-1. Purpose

These standards aims to help ensure proper management of chemical substances by establishing criteria and informing our business partners of the strict chemicals usage in our products or manufacturing process.

1-2. Scope of Application

Applied to all finished products, unit items, components, materials, consumables, accessories, optional items, packaging materials, sub-materials for production that are used in our products*.

This does not apply to packaging materials to be used only for shipping of items delivered to us.

*The term "our products" refers to products sold under brand regardless of manufacturers, and products manufactured by us and sold under other brands.

1-3. Terms and Definitions

2-2. Restricted Substances in Products

"Restricted Substances in Products" refers to chemical substances whose future use in our products is prohibited according to laws and regulations at home and abroad as well as environmental label criteria.

Restricted substances in products will be designated as banned substances in products after "Standards on the Management of Certain Chemical Substances" are revised typically 6 months prior to our prohibition date.

In consideration of the changeover period to the replacements, the prohibition date is normally set to be 1 year prior to the legally required deadline.

Chapter 3. Request to customers

3-1. Compliance with "Standards on the Management of Certain Chemical Substances"

For items whose compliance with our standards is instructed our drawings and requirements, please ensure that the banned substances in products respectively designated per subject according to the latest our standards are not used. For banned substances in products whose thresholds are set, please ensure that they are less than the threshold value. Please ensure that our standards are provided to your subcontractors and your suppliers, and that they are instructed to strictly adhere to these standards.

If revision is made to our standards and banned substances in products is newly added, please ensure that the banned substances in products will not be used since the implementation date of the revised standards.

* If drawings and requirements specifications include instructions on such items as halogen-free products and non-chlorine bleach, please also comply with such instructions.

3-2. System for management of Substances Included in Products

To ensure that our standards are continually adhered to, we request that you refer to the Guidelines for the Management of Chemical Substances in Products issued by JAMP and establish your own chemical substance management system.

Please ensure that these management instructions are also given to your subcontractors and your suppliers.

In order to perform continuous and reliable management of Substances Included in Products,

it is necessary that a management system for chemical substances covering the entire supply chain be built.

Please note that we may perform audits to verify your management system on chemical substances.

JAMP (Joint Article Management Promotion-consortium): <https://chemsherpa.net/>

3-3. Documents to be submitted

For each delivered product, please provide a non-use certificate and a chemSHERPA-AI/CI by the specified date. Please also submit separately a resin material data sheet for resin materials, a safety data sheet (SDS) for supply materials, and confirmation of material safety/conformity with laws and regulation. If revision is made to our standards and banned substances (banned substances in products, banned substances in production process) are added or scope, thresholds or exemptions are changed, please re-submit the non-use certificate. Please also re-submit chemSHERPA-AI/CI if restricted substances in products and monitored substances in Products are added to it.

3-3-1. Non-use Certificate

Our chemical substance management system will request submission per item.

For certain customers, the requests will be sent via email.

For the non-use certificate, the following formats are available to fit their respective target categories.

I. Non-use Certificate

Firstly, please select a component category (general parts / printed circuit board / power cord / battery / packing materials). Banned substances in products and threshold values vary according to their component category.

II. Non-use Certificate (Resin materials)

III. Non-use Certificate (Supply materials)

3-3-2. chemSHERPA-AI/CI

Our chemical substance management system will request submission per item.

For certain customers, the requests will be sent via email.

Please download the latest chemSHERPA-AI/CI format from the chemSHERPA website.

In filling in the chemSHERPA-AI/CI, please refer to the chemSHERPA's explanatory documents on the chemSHERPA website or the "chemSHERPA Article(AI) Creation Guide" on our chemical substance management system.

For resin materials and sheet metal materials of some components which are specified by the drawings, our unique chemSHERPA-AI creation means are specified. Please be sure to read our creation guide.

In creating chemSHERPA-AI, please obtain the chemSHERPA-AI and CI of the components and materials from your sub-customers.

chemSHERPA : <https://chemsherpa.net/chemSHERPA/>

3-3-3. Other formats

The formats for the "resin material information sheet" for resin materials and the "confirmation of material safety/conformity with laws and regulation" will be accompanied by a request email.
